

FOOT JOINT MOBILISATION

**2.5 DAY TRAINING COURSE
WITH AUSTRALASIAN EXPERT
MAREE GIFKINS

CHRISTCHURCH
30 – 2 JULY 2017

When upright, the body is reliant on the foot for balance and stability. If any of the 28 bones in the feet are incorrectly aligned (or subluxed) the whole body is affected.

The knee can rotate inwards; this then affects the hip, which in turn affects the back, groin and stomach muscles. This abnormal stress can radiate up to the neck and shoulders as the body attempts to compensate for the incorrect alignment of the bones in the feet.

WHO CAN TAKE THIS WORKSHOP?

Everyone who has a desire to work with people Reflexologist, Podiatrist, Acupuncturists, Chiropractor, Osteopath, Sports Therapist, Massage Therapist, Spiritual Healers etc.

With proper training and experience, you can become a pioneer in this field.
